Solution Code

```
class Solution {
public:
    string makeGood(string s) {
        stack<char> st;

        for(char c : s) {

            if(!st.empty()) {

                char x = st.top();
                if(tolower(c) == tolower(x) && c != x) {
                    st.pop();
                    continue;
                }

            }

            st.push(c);

        }

        string ans = "";
        while(!st.empty()) {
            ans += st.top();
            st.pop();
        }

        reverse(ans.begin(), ans.end());
        return ans;
    }
};
```
