

LeetCode 28: Find the Index of the First Occurrence in a String

Authored by: Arpit Raj, LNMIIT Jaipur | Date: September 4, 2026

Solution Implementation (C++)

```
class Solution {
public:
    int strStr(string haystack, string needle) {

        //METHOD 1 -----BUILT IN-----
        // if(haystack.find(needle)==string::npos) return -1;
        // else return haystack.find(needle);

        //METHOD 2 -----manual-----

        int n = haystack.size();
        int m = needle.size();

        for(int i = 0; i + m <= n; i++) { //try every start position
            bool flag = true;
            for(int j = 0; j < m; j++) {
                if(haystack[i+j] != needle[j]) {
                    flag = false;
                    break;
                }
            }

            if(flag) return i;
        }

        return -1;
    }
};
```

```
}  
};
```
