

LeetCode 844: Backspace String Compare

Authored by: Arpit Raj, LNMIIT Jaipur

Date: September 9, 2026

C++ Implementation

```
class Solution {
public:
    bool backspaceCompare(string s, string t) {

        stack<char> st1;
        stack<char> st2;

        for(char c:s){
            if(c=='#'){
                if(!st1.empty()){
                    st1.pop();
                }

            }
            else{
                st1.push(c);
            }
        }

        for(char c:t){
            if(c=='#'){
                if(!st2.empty()){
                    st2.pop();
                }

            }
        }

    }
};
```

```
        }
        else{
            st2.push(c);
        }
    }

    if(st1.size()!=st2.size()) return false;

    while(!st1.empty()){
        if(st1.top()!=st2.top()) return false;

        st1.pop();
        st2.pop();
    }

    return true;
}
};
```
